

How to send BUSD from your Binance account to your Metamask on the Binance Smart Chain (BSC)

1. Log in to your Binance account
2. Select Withdraw Crypto
3. Select BUSD
4. Select Network - BSC Network (You HAVE to select The BSC Network here. If you don't, your funds may get lost) and confirm

BSC selected as the transfer network. Few platforms support the BSC network. Please confirm that the receiving platform supports this network.

[Return](#) [Confirm](#)

5. Open your Metamask and select BSC BSC Mainnet from the drop-down menu on the top of your Metamask. Now copy the address as indicated in from the picture below.

Account 1

Not connected   **COPY THE ADDRESS**

8.206412 BNB

Buy Send Swop

6. Paste the copied address in step 1 from the picture below (unless you have already whitelisted your metamask address)

7. Ensure you see the network set to BSC in step 2 from the picture below.

8. Enter the withdrawal amount you like to send to your Metamask in step 3 from the picture below.

12. Once Binance has confirmed your withdrawal, open your Metamask and check your BUSD balance.

13. If BUSD isn't visible in your Metamask, import it by clicking the "Import Tokens" as indicated in the picture below step 1. Once done you will be asked to enter the token contract address in step 2 from the picture below which is: 0xe9e7CEA3DecA5984780Bafc599bD69ADd087D56.

You will see that in the second field BUSD is populated and in the third field, it shows 18 decimals. Click Add Token as indicated in step 3 from the picture below, and you are all set.
